

## Housing in Germany

Participants in the International Employee Development Year program will be accommodated within easy reach of the Academy during the six-month period in Berlin. You will need only a short bus trip to arrive punctually each morning.

You will have a studio apartment with kitchenette and private bathroom. Laundry facilities are available on site. Shopping and recreation is also convenient.

Public transportation to the center of Berlin is within walking distance. Train and air connections are also easy to reach.

During the second half-year you will have housing convenient to the Siemens department where you will be working.

Our international support team will assist you throughout the program by answering questions, offering advice and generally help you adjust to life in Germany.

Siemens Professional Education

## Are you ready for the world?

A world-leader in high-tech with locations in more than 190 countries, the success of **Siemens AG** is based upon highly-skilled, internationally-oriented employees.

Employees who can network with colleagues in other countries, on other continents, in fluent English.

Employees who have an understanding of and an appreciation for other cultures.

Employees who can work in international teams to support and direct transnational projects.

Employees who know how to effectively document and share their knowledge with colleagues worldwide.

### More than just technology

Technical know-how is only one factor for success on the job. Other skills are increasing in importance for advancement in the global workplace. These include:

- Networking
- Teambuilding
- Knowledge Management
- Project Management
- Process Management
- Cultural Diversity

And because Siemens is a German company, you will learn basics of the language which facilitate better communication with Siemens colleagues in Germany.

## One year program

This one year English-language program is designed for qualified Siemens employees.

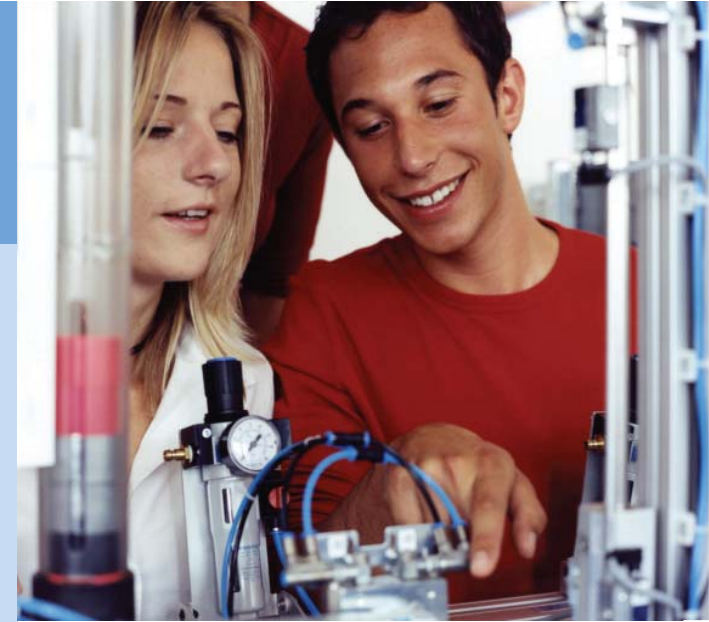

The first six months take place at the Siemens Technik Akademie in Berlin. During this half-year you will work intensively in teams on challenging technical projects, deepening your knowledge of project and process management.

To prepare you for your transnational project in the second half-year, you will also focus on specific key technical topics. In addition, you will receive basic training in conversational German.

During your time in Berlin there will also be a strong focus on intercultural issues, which will prepare you for working and communicating successfully on a global level.

During the second half-year you will work on a complex joint project between your Siemens unit in your home country and a corresponding department in Germany.

Throughout this program you will meet and work with Siemens colleagues from a variety of countries, building a professional contact network which will support you throughout your career with Siemens.

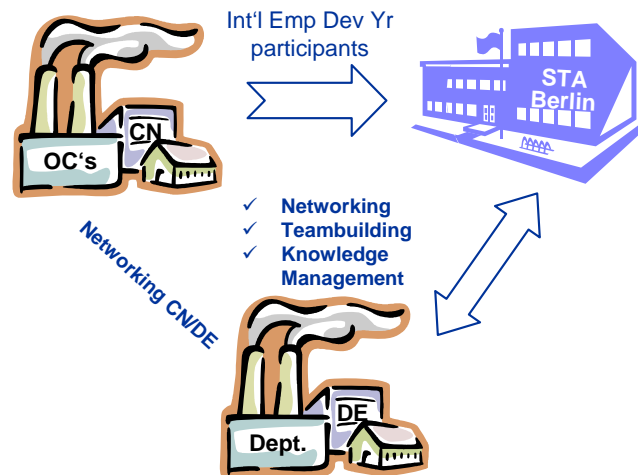

At Siemens Technik Akademie Berlin our business is to prepare the next generation of successful technical personnel for challenging international assignments.

With the support of our experienced instructors in Berlin, you will participate in an exciting team-oriented learning process which will prepare you for your future success at Siemens.

Additionally you will have the opportunity to experience first-hand life in Germany and learn more about the German way of doing business.

When you return to your department in your home country, you will bring invaluable skills, knowledge and a solid contact network with you.

## Go international with Siemens

## Key to success
